

THE FUTURE OF OUR RIVERS:

GLOBAL PERSPECTIVES ON COLLABORATION, INTEGRATED WATER MANAGEMENT AND CLIMATE CHANGE

International Riverfoundation Feature Session

Protecting **rivers** for future generations

- Provide **leadership** in restoring rivers
- **Champion** best practice
- A **catalyst** to share knowledge

IRF works in partnership to

- **Award best practice**
 - International Thiess Riverprize
 - National Thiess Riverprize
- **Share Knowledge**
 - International Riversymposium
 - Sponsored Delegates Program
 - Twinning Program

GLOBAL PERSPECTIVES ON COLLABORATION, INTEGRATED WATER MANAGEMENT AND CLIMATE CHANGE

Aim: To discuss and document global perspectives on critical issues related to rivers and climate change

Discussion Topics

1. Stakeholder participation, science, and decision-making in Integrated Water Management

- Teresa Moncarz and Olita Ojongo

2. Partnerships and collaboration in catchment management

- Johnny Sundstrom

3. Climate Change and mitigating the effects through catchment management

- Alistair Driver
